

SCULPLLA H2 PROMOTER REPAIR EYE CREAM

Plump up fine lines and crow's feet with this unique blend of PLLA, Volufiline, 4GF, PDRN. This luxurious eye cream penetrates quickly hydrates, leaving the eye looking smooth, and firm.

Active Ingredients

PLLA [Poly-L-Lactic Acid] Bio Stimulatory dermal filler, which means it stimulates your own skin to produce new collagen. PLLA will help reduce wrinkles, and helps to fill in hollow or sunken areas on the face. The effects of PLLA appear gradually over a few months, producing natural results.

4GF [EGF, FGF, IGF, TGF]

EGF [Epidermal Growth Factor] is a factor of the epidermis cell regeneration, which acts at the molecular and cellular level. EGF helps stimulating cell growth in tissues throughout the human body. Binding with the receptor EGFR, this protein increases the cell count and skin turnover while boosting the production of collagen and elastin resulting in reduced wrinkles and rejuvenated and improved skin texture.

FGF [Fibroblast Growth Factor] is a factor that activates the processes of growth and divisions of skin cells, provides antioxidant and detoxifying effect, stimulates the proliferation of fibroblasts, healing wounds, embryonic development, and angiogenesis. It also promotes the blood vessels development and collagen synthesis of the dermis.

IGF [Insulin-like Growth Factor] is a factor that functions as cell growth and multiplication booster, regulates intracellular metabolism and stimulates cell renewal. Involved in the synthesis of collagen and elastin, improves firmness and density of skin.

TGF [Transforming Growth Factor] is factor that helps collagen production and fibronectin, restores the structure of Collagen and elastin.

PDRN [Polydeoxyribonucleotide] a Covalent bond molecule created using salmon DNA fragments. These molecules stimulate cell growth in tissues and speed up wound healing, and increase the metabolic activity of cells in the skin by regenerating key components like collagen and glycoprotein.

VOLUFILINE It is an extract from the roots of asian botanical Anemarrhena Asphodeloides, in an oil-soluble excipient. It promotes body volume by a cosmetic lipofilling-like effect. It stimulates adipocyte differentiation and proliferation and promotes lipid storage leading to an increase of adipocyte volume in the fatty tissues.

BETTER THAN BOTOX?
INTRODUCING
"VOLUFILINE"

Water, Isopentyldiol, Caprylic/Capric Triglyceride, Glycerin, Simmondsia Chinensis (Jojoba) Seed Oil, Trehalose, 1,2-Hexanediol, Niacinamide, Hydrogenated Polyisobutene, Betaine, Thiotaurine, Poly-L-Lactic Acid, sh-Polypeptide-22, sh-Oligopeptide-1, sh-Oligopeptide-2, sh-Polypeptide-15, Sodium DNA, Sodium Hyaluronate, Anemarrhena Asphodeloides Root Extract, Madecassoside, Tremella Fuciformis (Mushroom) Extract, Hydrolyzed Collagen, Argininem, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Carbomer, Panthenol, Polyglyceryl-6 Polyricinoleate, Centella Asiatica Extract, Ethylhexylglycerin, Glyceryl Caprylate, Adenosine, Disodium EDTA
